▼ Power Connectors

Retailers that give customers a chance to fully experience their merchandise are more likely to increase sales. InVue's HS Series allows customers to experience products while preventing theft. Power up and boost your sales by 30 percent!

ACCESSING POWER CONNECTORS

1. Visit www.invue.com
2. Click on **"Customer Login"**
3. Click on **"Find"** and select **"Power Connectors"**
4. Search for the merchandise you are powering up

The screenshot shows the InVue website interface. At the top, the InVue logo is on the left, and a 'Find' button is on the right. Below the logo, the search term 'power connector selector ® | finding the right power connector' is displayed. A search bar with the placeholder text 'Keywords, ordercode, part number' is shown, with a yellow arrow pointing to it from the left. Below the search bar, there are filters on the left: 'InVue Series', 'Device type', and 'Brand'. To the right of the filters, it says 'Showing 1 - 8 of 22221'. A 'Download' button is also visible. The main content area displays four product listings for 'Aiptek A-HD Camcorder'. Each listing includes a product image, the series name (Series 1000, PODs Series 2000, Series 900, Series 940), the model number (HC7142), and the description 'Power Connector JVC USB'. A 'Details' button is present for each product. The first two listings have images of the power connector, while the third has a 'No image available' placeholder.

IR3 Key

Upgrades the IR Ecosystem™ with new capabilities.

The IR3 Key is compatible with all current and future InVue products. This 3rd generation IR key has an extended battery life and an economical 8-up charger that reduces the cost of ownership.

The IR3 also enables store zoning and associate usage tracking via InVue Access Manager for Smart Lock, Series 1060 and 1560 as well as our Commercial Solution CT300. More than half of retail theft is internal. InVue is the only company that helps you control external and internal theft.

Features and benefits

- 1** Works with all InVue current and future products — factory set in IR2 mode to operate with IR Programming Station makes it backwards compatible
- 2** Extended key life and economical 8-up charger reduces cost of ownership; single key charger with micro USB power supply also available
- 3** Intuitive visual feedback ensures proper usage
- 4** Green LEDs alert you to authorization time/ time out and battery life
- 5** When paired with Access Manager:
 - › Allows the store to be zoned and set associate access to Locks and PODs
 - › Allows store management to audit every Lock or POD access and know exactly who accessed and when
 - › Programmable key attributes via Access Manager tailor key timeout, sounder alert duration and volume
