**iNVUE**

# Cordless Security

# Series 3000

*Cordless security: the ultimate customer experience.*

The POD Series 3000 showcases InVue innovation at its best. Series 3000 is the first cordless security device for handheld electronics, allowing your customers the ultimate merchandise experience within a preset perimeter inside the store. The Series 3000 provides retail merchandise security with absolutely no cords, giving your customers unprecedented freedom in their shopping experience.

**Features and benefits**

**1** Completely cordless alarming security

**2** Contact charging supports all Micro USB and Apple devices

**3** "Gold is Good" LED indicates armed status

**4** Alarm-on-product ensures that a stolen device can be tracked as it moves through or exits the store

**5** Alarm-in-stand ensures that alarm is heard, even if thief attempts to suppress alarm on product

**6** Utilizes InVue IR Key to set perimeter and arm/disarm; part of the InVue IR Ecosystem™

› Fully adjustable security perimeter

› Pre-alarm warns customers when they are approaching security perimeter

# Security for
# Handheld Electronics

# Series 1560
*Increase accessory sales with cross-merchandising.*

The industry's first split-level POD allows retailers to easily and securely cross-merchandise accessories next to smartphones and tablets with the same stand. Features alarm-on-product and alarm-in-stand, optional arms, and optional lockdown provide scalable security.

**Features and benefits**

**1** Split level design (recoiler below counter) minimizes visual impact of the stand and makes the product the hero

**2** Ability to cross-merchandise accessories next to smartphones and tablets via a powered accessory alarm port

**3** Alarm in sensor makes stolen product difficult to hide — alarm on base provides additional indication of breach

**1**

**3**

**2**

**Features and benefits (continued)**

**1** Small sensor provides minimal interference

**2** Nightly removal capability is simple with adjustable security screw (tools required)

**3** Optional brackets and quarter-turn lock down provide scalable deterrence

**4** Industry's lowest pull-force recoiler

**5** Serial IR Key interface provides compatibility with InVue Access Manager zone control and auditing

# Series 1050

*Protect a device and an accessory with a single stand.*

The POD Series 1050 hidden cord solution offers significant advantages in consumer experience, performance, display design and ease of use. InVue's exclusive Easy Pull™ recoiler is the industry's lowest force recoiler providing customers a smooth, consistent pull and flexible movement while interacting with the merchandise. The Series 1050 has an auxiliary alarming port making it the ideal solution for co-merchandised displays that incorporate high-value accessories.

**Features and benefits**

1 Above-counter POD for easy installation with no visible cords
2 Onboard auxiliary alarm port allows protected display of electronic accessories
3 Recoiler is smooth, quiet, and easy to pull
4 Small sensor size provides minimal interference
5 100 dB alarm is loud enough to be heard in noisy environments
6 Optional brackets are fully adjustable and do not interfere with customer experience
7 Storewide single key solution

# Series 2800

*Power up and secure any merchandise with one system.*

The S2800 is a flexible, multi-position security system that allows retailers to secure multiple electronics and accessories on a single fixture or display. Designed for single applications, mixed-use tables and branded ecosystems, the S2800 is a modular smart voltage regulation system with multi-voltage power boxes and a full portfolio of sensors that can be configured to accommodate different needs. The under counter architecture is future-proof and is easily remerchandised for the addition of new products.

**Features and benefits**

› Designed for branded ecosystems, mixed-use displays and category-specific displays with a single alarm and power architecture

› Enhanced system flexibility by easily adding or removing above counter assets to protect any device

› 'Smart voltage regulation' that recognizes, adjusts and compensates for any voltage loss between the Power Box and the device. Tablets, handhelds and cameras can be connected to the same Power Box and be easily merchandised.

› One Alarm Unit can be connected to up to four power / alarming boxes or four alarming only boxes which is a true 1:many solution allowing up to 16 powered and 16 alarming only positions or 32 alarming only positions

› Under counter architecture is future-proof and is easily remerchandised for the addition of new products

› Multiple, different alarm tones created to alert you when more than one position is alarming

› 105-110 dB alarm is loud enough for noisy environments

› 1 to many alarming only solution is compatible with all Zips 2.0™ sensors

› One stand for tablet and handheld devices allows for interchangeability

**Features and benefits (Wave I)**

1  Floating medallion gives the ability to adjust the cable length for a cleaner display (not pictured)

2  Open-Air cable allows consumers to get the true feel and weight of the merchandise

3  'Gold is Good' LED indicator

4  Daily removal capability

5  AP sensing for micro USB

6  One stand for tablet and handheld devices allows for interchangeability

**Features and benefits (Wave II)**

**1** Perfect Placement® ensures merchandise is always display properly

**2** Layered security with adjustable brackets for handhelds and tablets

**3** Supports Apple devices with lightning sensors

**4** Cost-effective solution for multi-position tablets when combined with 4x4 Power Box

**5** Optical sensor provides compatibility with digital signage solutions

**6** Optional screw mount for additional security

**7** 2 x 2 Power Box allows flexibility in scaling displays (not pictured here)

*NOTE: OEM power supply or PS512 power supply can be used to power alarm unit. PS512 is not required if using OEM power supply.*

# Series 2400
*Low cost. High impact.*

**Protects handhelds and tablets in low-threat environments.** Series 2400 provides a clean, minimalist above-table presentation and lowest-cost below-counter alarming for up to eight devices. InVue quality in a low-cost solution eliminates annoying false alarms and product failures experienced in lesser quality solutions.

**Features and benefits**

1 Unique sensor cable design allows the use of OEM provided charger and cable

2 Gold LED on sensor provides status indication

3 Uses a single IR port that can be mounted above or below counter

4 No power connection required for alarm unit — uses CR123 battery

5 Simple to install and easy to use

6 Small footprint makes the merchandise the hero

7 IR Key — industry's safest and most intuitive key system

## PRODUCT ORDERING

# Series 950
*Bigger performance, smaller presence.*

**The Series 950 provides the ease-of-use of an InVue POD with a stand that's smaller than line alarm.** Its compact size, lightweight open-air cable and small sensors delivers an unmatched customer experience. Further, it installs in seconds, is simple to remerchandise andmaintain, and is scalable in its security options.

**Features and benefits**

1 "Gold is Good" AP sensor LED clearly indicates armed status

2 Sensor cables are designed to allow easy daily merchandise removal

3 IR interface is easily accessible above the counter

› Backup battery with low battery indicator

› Low audible alarm sounds if merchandise is removed, cables are cut or display stand is moved

› Optional screw mounting kit and steel bracket arms allow for scalable security

› ybuy compatibility is standard

**Unmatched Customer Experience**

1  "Open air" cable allows customers to experience the true weight and feel of the merchandise

2  4-way perfect placement ensures that merchandise is always displayed in the optimum viewing position

3  Small stand beautifully showcases the merchandise

# Series 950 Hidden Lens Sensor
*Lens security with quick and easy interchangeability.*

The S950 Hidden Lens Sensor delivers an unrivaled customer experience, allowing store staff to swap out lenses so customers can try a variety of lenses for a camera while keeping the lens safe and secure. The S950 Hidden Lens Sensor also provides robust alarming security for the lens, while eliminating the need for a large exterior sensor or zip tie. The S950 Hidden Lens Sensor was designed for retailers and brands with a DSLR lens bar or environments that secure high-end camera lenses with Smart Lock or behind locked cabinets.

**Features and benefits**

1  A hidden alarming lens sensor that doesn't disrupt the consumer experience
2  No zip ties or sensor mass on lens to interrupt the shopping experience
3  Compatible with S950 Camera Sensor

4  Enables store staff to quickly and easily interchange camera lenses
5  Comes with 'Do Not Remove Lens Alarm' on the lens to act as a visual theft deterrent (not pictured here)

# Alarm On Merchandise Protection

# Type C Power Injection Sensor
*Innovative laptop and notebook security that powers and alarms.*

Protect and power USB-C laptops and notebooks with a discreet sensor providing security and power is provided by a single cable secured to the device with minimal aesthetic impact. Power injection — using OEM power — delivers optimum current and voltage to new, power-hungry devices.

**Features and benefits**

**1** Single sensor — universal design can be used with: PODs Series 2800, 1050, 1060 and 1560; and Zips 2.0 (shown below with Series 2800)

**2** Layered protection — use discreet Mylar adhesive strip as standard, or upgrade to a metal L-bracket for increased retention force (not shown)

**3** Power and alarm in one cable provides superior aesthetics (minimizes cables and cords)

# LT03
*Proven protection for laptops.*

**Provide your customers a greater tablet and laptop experience.** Unlike competitive products, the LTO3 provides outstanding security without getting in the way of your customer's experience trying out the merchandise. Light weight and unobtrusive, the LTO3 is the perfect solution for tablets and laptops on display.

**Features and benefits**

**1** Alarming unit remains on merchandise

**2** A variety of sensors protects a range of accessories

**3** Two auxiliary ports allow additional sensors to be used to protect detachable keyboards and accessories (LTO1551 only)

**Security that is easy to use and maintain**

**1** Gold LEDs continuously indicate system status

**2** Magnetic positioning always orients merchandise correctly

**3** AP sensor with Friction Fit minimizes false alarms

**4** Easy access to IR interface

# IR Ecosystem

# IR3 Key
*Upgrades the IR Ecosystem™ with new capabilities.*

The IR3 Key is compatible with all current and future InVue products. This 3rd generation IR key has an extended battery life and an economical 8-up charger that reduces the cost of ownership.

The IR3 also enables store zoning and associate usage tracking via InVue Access Manager for Smart Lock, Series 1060 and 1560 as well as our Commercial Solution CT300. More than half of retail theft is internal. InVue is the only company that helps you control external and internal theft.

**Features and benefits**

1  Works with all InVue current and future products — factory set in IR2 mode to operate with IR Programming Station makes it backwards compatible

2  Extended key life and economical 8-up charger reduces cost of ownership; single key charger with micro USB power supply also available

3  Intuitive visual feedback ensures proper usage

4  Green LEDs alert you to authorization time/ time out and battery life

5  When paired with Access Manager:
   › Allows the store to be zoned and set associate access to Locks and PODs
   › Allows store management to audit every Lock or POD access and know exactly who accessed and when
   › Programmable key attributes via Access Manager tailor key timeout, sounder alert duration and volume
