Zips! Power

Power and secure high theft, premium accessories.

Provides power and security to consumer electronic accessories. For optimal charging, power is provided up to 5V, 1A, and an internal battery maintains security if store power is lost. The sensor can be detached to support daily removal.

IR3 Key

A single key for a storewide security solution

The IR3 Key transfers power and communicates with all InVue products to allow a single key to operate any InVue device in a store. The IR3 Key automatically times out after 12 hours and only works within a single store, so lost or stolen keys become useless.

An integrated micro USB port allows single key charging or charging with the 8-up capacity IR3 Key Charger. The IR3 Key provides LED visual feedback for key authorization, battery life and programming time out. When paired with Access Manager, the IR3 Key enables zoning and auditing for key authorization and employee usage tracking.
